The Italian-speaking monograph Mario Botta: Architetture 1960-1985 (Electa, 1985) showcases and analyses the key works of the Swiss postmodern master.

Shows sketches, plans, and photographs of houses, laboratories, office buildings, municipal buildings, banks, libraries, and schools designed by the Swiss architect

"Modern Italy"may sound like an oxymoron. For Western civilization,Italian culture represents the classical past and the continuity of canonical tradition,while modernity is understood in contrary terms of rupture and rapid innovation. Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity. We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting. The ancient forum, medieval cloisters,baroque piazzas,and papal palaces constitute our ideal itinerary of Italian civilization. The Campo di Siena,Saint Peter's,all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time;but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations. As seasonal tourist or seasoned historian,we edit the encroachments time and change have wrought on our image of Italy. The learning of history is always a complex task,one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years. Culture on the peninsula continues to evolve with characteristic vibrancy. Italy is not a museum. To think of it as such—as a disorganized yet phenomenally rich museum unchanging in its exhibits—is to misunderstand the nature of the Italian cultural condition and the writing of history itself.

Botta's characteristic respect for topographical conditions and regional sensibilities, his deft craftsmanship, and the importance of geometric order in his work are evidenced in thiry projects that range from smaller residential buildings to such grandiose projects as the Church of San Giovanni Battista, the Jean Tinguely Museum and, most famously, the San Francisco Museum of Modern Art. This detailed study also includes the designs he created for furniture and the stage.

Makers of 20th-Century Modern Architecture is an indispensable reference book for the scholar, student, architect or layman interested in the architects who initiated, developed, or advanced modern architecture. The book is amply illustrated and features the most prominent and influential people in 20th-century modernist architecture including Wright, Eisenman, Mies van der Rohe and Kahn. It describes the milieu in which they practiced their art and directs readers to information on the life and creative activities of these founding architects and their disciples. The profiles of individual architects include critical analysis of their major buildings and projects. Each profile is completed by a comprehensive bibliography.
