SAP Training: SD Master Data Setup and Configuration

MDI is a cornerstone of
SAP's new integration
strategy for master data.

It acts as the master data
broker between your
core HR system of
record – for example,
SAP SuccessFactors

Download Free Master Data

Employee Central – and SAP S/4HANA. It essentially creates a hub-and-spoke data distribution system using a standardized subset of employee master data in a common repository; this is sometimes referred to as a mini-master.

HR305 - Configuration of Master Data | SAP Training

Data stored in SAP R/3
is categorized as .
Master Data and ;
Transactional Data.

Download Free Master Data

Master data is the core data that is used as a base for any transaction.

If you are producing, transferring stock, selling, purchasing, doing physical inventory, whatever your activity may be, it requires certain master data to be maintained.

Example of Master Data

. Material master data ;

Customer master data

Download Free Master Data Configuration In **Introduction to Master Data in SAP**

Master Data is data which do not change so frequently as you mentioned rightly. And master data is used in order to carry out the transactions in CRM. Example: Product Master, Business Parters, Org Data, Condition Records to

Download Free Master Data

determine the price are all examples for master data. Without master data, there cannot exist any transactions.
