You shouldn't set task start dates in Project 2002 very often. That's because projects are fluid — they change and grow faster than bad guys come at you in the average computer game. If you build in a timing logic, rather than assigning certain dates to tasks, Project can reflect changes by adjusting your project based on that logic. So, if the task of getting materials in-house is delayed by a week, the dependent task of starting the manufacturing process automatically moves out a week.
