General Submission Information All articles should be uploaded as MS Word documents through our ScholarOne system. IJMES focuses on the area encompassing the Middle East and adjacent geo-cultural regions from the seventh century to the present.

Sponsored by the Middle Level Education Research SIG of AERA, this inaugural volume in the new IAP book series, *The Handbook of Resources in Middle Level Education*, focuses on the contributions and impact of the leaders of the modern middle school movement. Contained with this volume are the edited transcripts from 20 extensive interviews of the most influential leaders of the middle level movement, including such notable figures as William Alexander, Donald Eichhorn, John Lounsbury, Conrad Toepfer, and Gordon Vars. This historic volume will be an invaluable resource to proponents,

advocates, and students of the middle school concept and developmentally appropriate education for young adolescents.

Nothing provided

Middle Grades Research Journal (MGRJ) is a refereed, peer reviewed journal that publishes original studies providing both empirical and theoretical frameworks that focus on middle grades education. A variety of articles are published quarterly in March, June, September, and December of each volume year.

This volume, the ninth volume in the Handbook of Research in Middle Level Education, is a compilation of research studies focusing on the use and implementation of common planning time (CPT) in middle level schools. All of the studies were part of the Middle Level Education Research SIG's National Middle Grades Research Project (NMGRP) on Common Planning Time, which provides additional evidence about teachers' understandings, experiences, the benefits and barriers about CPT. Since all researchers participating in the SIG-sponsored project utilized the same data collection protocols and followed the same protocols, the overall data collection was systematic and is highly reliable. Five research questions were generated to guide the development of the data collection protocols. While the authors were encouraged to use their data to address these project-level questions, they were not required to do so. The project consisted of both qualitative and quantitative data collection. Phase I (qualitative) consisted of observations of CPT meetings and structured interviews with teachers. Phase II (quantitative) was comprised of an online teacher survey. Within the chapters of this volume, a variety of relevant and meaningful research questions are examined utilizing both qualitative and quantitative methodologies.
