“Wheel books” were once found in the uniform pockets of virtually all junior officers and many senior petty officers. Each small notebook was unique to the Sailor carrying it, but all had in common a collection of data and wisdom that the individual deemed useful in the effective execution of his or her duties. Often used as a substitute for experience among neophytes and as a portable library of reference information for more experienced personnel, those weathered pages contained everything from the time of the next tide, to leadership hints from a respected chief petty officer, to the color coding of the phone-and-distance line used in underway replenishments. In that same tradition, the Naval Institute has created and aptly named the Wheel Book series, portable libraries culled from USNI’s vast array of information that has accumulated for more than a century. Articles from the Institute’s flagship publication Proceedings are combined with selections from USNI’s oral history program and from Naval Institute Press books to create unique guides on a wide array of relevant professional subjects. Just as the “wheel books” of yesterday served the fleet well, the Naval Institute Wheel Books of today provide supplemental information, pragmatic advice, and cogent analysis on topics important to modern naval professionals. The Dictionary of Modern Strategy and Tactics describes strategy as having “a permanent nature, but an ever-changing character.” For more than a century, both the nature and the character of this essential discipline have been explored in depth by contributors to the Naval Institute’s magazines, books, and oral histories. Drawing from those powerful resources, this carefully selected collection makes clear why naval strategy has always straddled the boundaries between art and science and why its study and employment are essential components of the sea service profession.

In December 2014, the Senate Select Committee on Intelligence (SSCI) released a 500+ page executive summary of a 6,000 page study of the CIA's detention and interrogation of al Qa'ida terrorists. In early 2015 publishers released the study in book form and called it "the report" on "torture." Rebuttal presents the "rest of the story." In addition to reprinting the official responses from the SSCI minority and CIA, this publication also includes eight essays from senior former CIA officials who all are deeply knowledgeable about the program and yet none of whom were interviewed by the SSCI staff during the more than four years the report was in preparation. These authors of the eight essays are George Tenet, Porter Goss, Gen. Michael V. Hayden, USAF (Ret.), John McLaughlin, Michael Morrell, J. Philip Mudd, John Rizzo, and Jose A. Rodriguez, Jr.

The present volume contains the proceedings of the Seventh International East-West Symposium of New Testament Scholars in Moscow 2016. Its contributions are devoted to different aspects of the question of the relation between history and theology in New Testament and extracanonical Gospel literature. They deal with problems regarding the impact of critical historical approaches for New Testament theology, the relation between the Gospels' claim for truth and historical facts, Orthodox receptions of the Gospel literature, and the presentation of "the" Gospel in Byzantine liturgy.
