### **PT Neuro Exam and Treatment: The Basics and Beyond**

General physical examination: The patient is obese but well-appearing. Temperature is 37.6, blood pressure is 128/78, and pulse is 85. There is no tenderness over the scalp or neck and no bruits over the eyes or at the neck.

### **Sample Write-Ups - Department of Neurology Home**

Examining the neurological system is different in young children compared with older children and adults. The components of the complete exam are extensive and usually cannot be performed in a classical fashion. This approach may be carried out on a cooperative school-aged child - but always be mindful of keeping the examination fun.

### **Paediatric Neurological Examination - OSCE Guide | Geeky ...**

The neurological exam consists of the: 1) Motor Exam 2) Sensory Exam 3) Reflex Exam. Of note, the major nerve roots to examine include L4, L5 and S1 as they are the most commonly affected. Therefore, we will focus on these three roots as well for each neurological exam. Click this link to jump to the section on the neurological exam in the video.

### **Low Back Exam, Approach to | Stanford Medicine 25 ...**

While testing muscle strength, it is important to keep in mind anatomic information such as which nerves, nerve roots, and brain areas control each muscle and to allow this information to guide the exam. Also compare proximal versus distal weakness because these features can sometimes suggest muscle versus nerve disease, respectively.

### **Neuroexam.com - Strength of Individual Muscle Groups**

Like all other aspects of the physical exam, there is a wealth of information that can be obtained from the neurological examination, provided that it is done carefully and accurately. This is, of course, predicated on learning how to do it correctly. A few practical considerations/suggestions:

### **The Neurological Examination - University of California ...**

For the ability to sense a sharp object, the best screening test uses a safety pin or other sharp object to lightly prick the face, torso, and 4 limbs; the patient is asked whether the pinprick feels the same on both sides and whether the sensation is dull or sharp.

### **How to Assess Sensation - Neurologic Disorders - Merck ...**

In the neurological exam above all others, inspection is vital. Introduce yourself with a (careful) hand shake. This may provide the first clue to diagnosis: Unable to see your hand (neglect, blindness) Unable to lift their hand to shake yours (paralysis, weakness) Unable to easily release your hand (myotonic dystrophy) Overall inspection
