Our Cosmic Ancestors is a dynamic work unraveling the messages of these 'universal astronauts' and decoding the symbols and visual mathematics they have left for us in the Egyptian Pyramids, Stonehenge, the Mayan calendar, the Maltese Cross and the Sumerian zodiac. The book is captivating reading from beginning to end. However Mr. Chatelain's purpose in sharing these exciting discoveries lies in the hope that all humans will extend their horizons, to release fear of the unknown just enough that another generation will exhibit growing curiosity to continue the search for signs of purposeful nurturing of this planet.

Machine Praise for the previous  
edition: "I have read many books  
about self-publishing and have to say  
how impressed I am with the  
incredible detail and research that  
went into putting this book together.  
Demers goes through virtually  
everything an author who wants to  
understand this world would need to  
know in order to make informed  
decisions. This tops my recommended  
list for anybody considering learning  
more about self-publishing in either

the US (and other) markets. Americans will also find it helpful. I also found the writing, particularly that in the introduction, engaging. I am already recommending this to my clients."

--Audrey Owen, Writer'sHelper.com

"This book is well-written, well-organized, and very thorough.

Demers' writing background shows, and it is clear that she talks from first-hand experience. I consulted the book countless times during my own process to publish and it saved me a lot of aggravation and frustration."
