Nmfc Freight Class Guide Idc The National Motor Freight Classification (NMFC) is the standard which enforces this system, grouping commodities into one of 18 classes - ranging from 50 to 500. The NMFC determines this class using four characteristics: Density, Stowability, Handling, and Liability.

Nmfc Freight Class Guide Idc - rsmhonda2.dealervernom.com

A commodity's NMFC code is combined with its density to produce a freight class. Typically, commodities with a lower density are lighter (feathers and mattresses) and/or more fragile (lightbulbs) and are in a higher class. Higher density items (bricks or rebar) are less fragile and heavier, therefore are in a lower class.

Freight Class: All You Need To Know About NMFC Code ...

To find the NMFC (National Motor Freight Classification) code listing for the item you're shipping, go to the category below that best matches your cargo. Click on the downward-facing arrow to the left of the category to expand that category. Drill down through the category until you find the freight class for your shipment.

Freight Class Lookup Tool | Find NMFC Codes | FreightCenter

The Standard for Freight Identification and Classification The National Motor Freight Classification ® (NMFC ®) is a standard that provides a comparison of commodities moving in interstate, intrastate and foreign commerce. It is similar in concept to the groupings or grading systems that serve many other industries.

National Motor Freight Traffic Association

The use of an NMFC standard class simplifies the evaluation necessary for transporting the millions of products shipping every day in interstate, intrastate, and foreign commerce. Learn more about National Motor Freight Classification. What is freight density? Density is an important component to LTL freight classifications.

Freight Classification - Logistics Plus

As mentioned in our Freight Shipping Guide, your freight classification is determined by transportability which is defined by the density, stowability, ease of handling and liability of the cargo. While the classification of many items can be determined based on their density, some others will always be in the same freight class no matter what.
