Which get-out-the-vote efforts actually succeed in ethnoracial communities—and why? Analyzing the results from hundreds of original experiments, the authors of this book offer a persuasive new theory to explain why some methods work while others don’t. Exploring and comparing a wide variety of efforts targeting ethnoracial voters, Lisa Garcia Bedolla and Melissa R. Michelson present a new theoretical frame—the Social Cognition Model of voting, based on an individual’s sense of civic identity—for understanding get-out-the-vote effectiveness. Their book will serve as a useful guide for political practitioners, for it offers concrete strategies to employ in developing future mobilization efforts.

From assassinations to student riots, this is “a splendidly evocative account of a historic year—a year of tumult, of trauma, and of tragedy” (Arthur Schlesinger Jr.). In the United States, the 1960s were a period of unprecedented change and upheaval—but the year 1968 in particular stands out as a dramatic turning point. Americans witnessed the Tet offensive in Vietnam; the shocking assassinations of Martin Luther King Jr. and Robert Kennedy; and the chaos at the Democratic National Convention in Chicago. At the same time, a young generation was questioning authority like never before—and popular culture, especially music, was being revolutionized. Largely based on unpublished interviews and documents—including in-depth conversations with Eugene McCarthy and Bob Dylan, among many others, and the late Theodore White’s archives, to which the author had sole access—1968 in America is a fascinating social history, and the definitive study of a year when nothing could be taken for granted. “Kaiser aims to convey not only what happened during the period but what it felt like at the time. Affecting touches bring back powerful memories, including strong accounts of the impact of the Tet offensive and of the frenzy aroused by Bobby Kennedy’s race for the presidency.” —The New York Times Book Review

Her recent forecasts on the family are unwavering: the world is overpopulated, and with unemployment, college costs, and food prices all on the rise, having children is an extravagant indulgence. So it's no surprise when the tech giant Mammoth hires Sloane to lead their groundbreaking annual conference, celebrating the voluntarily childless. But not far into her contract, Sloane begins to sense the undeniable signs of a movement against electronics that will see people embracing compassion, empathy, and 'in-personism' again"--

Politicians of every stripe frequently invoke the Marshall Plan in support of programs aimed at using American wealth to extend the nation's power and influence, solve intractable third-world economic problems, and combat world hunger and disease. Do any of these impassioned advocates understand why the Marshall Plan succeeded where so many subsequent aid plans have not? Historian Nicolaus Mills explores the Marshall Plan in all its dimensions to provide valuable lessons from the past about what America can and cannot do as a superpower.
