Ice cream or sorbet, red meat or fish, fruits or pastries, eggs or oatmeal – our lives are filled with choices about what we eat. That's why Lori Smolin and Mary Grosvenor's Nutrition: Science and Applications, 4th Edition helps you understand how to analyze nutritional information and apply your knowledge to the nutrition issues you face each and every day. Now updated to include the new Dietary Reference Intakes (DRIs) published in the fall of 2002, the Fourth Edition offers new and expanded coverage of such cutting-edge nutritional topics as the relationship between genetics and body weight regulation and the ecological impact of genetically modified foods and organic food production. In addition, this edition features a new chapter, Meeting Nutrient Needs: Food Versus Supplements, which discusses the benefits and drawbacks of meeting nutritional needs with foods, fortified foods, and supplements, as well as the role of herbal supplements.

Nutrition: Science and Applications, 3rd Canadian Edition, provides students with a strong foundational knowledge of human nutrition, covering all

essential nutrients, their functions in the body, and their sources and dietary components. Presenting an innovative critical-thinking approach to the subject, this leading textbook goes beyond the basics to explore underlying nutrition processes while discussing the latest research, debates, and controversies related to nutrition and health. The text offers an accessible, visually-rich presentation of topics designed to be highly relevant and relatable to Canadian readers. The ideal text for college-level nutrition courses, this new edition features extensively revised and updated content throughout — aligning with the latest nutrition research, recommendations, guidelines, and Canadian government regulations. The authors' real-world approach enables students to apply concepts of nutrition science in their own lives as consumers, and in their future careers as scientists and health professionals. Balanced coverage of fundamental nutrition topics integrates with comprehensive discussion of nutrient metabolism, health and disease relationships, dietary patterns, Canadian and global nutrition issues, and much more.

This introductory nutrition text is intended for a first course in nutrition taken by anyone from non-science majors to nutrition majors. It teaches students the basic principles of nutrition science and how to apply them to food choices, as well as nutrition information they encounter. By integrating the theme of choice throughout, *Nutrition: Science and Applications, Third Edition* helps students understand that each dietary choice makes up only one component of an overall diet. The third edition also continues the integrated approach by incorporating health and disease, metabolism, cultural diversity, and life stage topics into each chapter. The third edition continues this text's reputation of unparalleled currency among nutrition texts by including new and expanded coverage of the following topics: The Dietary Reference Intakes (DRIs); nutrition and gene expression; regulation of body weight; dietary supplements; and environmental issues.

Ice cream or sorbet, red meat or fish, fruits or pastries, eggs or oatmeal—our lives are filled with choices about what we eat. That's why Lori Smolin and Mary Grosvenor's *Nutrition: Science and Applications, 4/E* helps you understand how to analyze nutritional information and apply your knowledge to the nutrition issues you face each and every day. Now updated to include the new Dietary Reference Intakes (DRIs) published in the fall of 2002, the Fourth Edition offers new and expanded coverage of such cutting-edge nutritional topics as the relationship between genetics and body weight regulation and the ecological impact of genetically modified foods and organic food production. Included are chapter outlines, multiple-choice questions, short-answer review questions, and a variety of learning activities.

Guiding nutritionists toward an understanding of the scientific principles underlying what they know about nutrition, this book helps them gain effective decision-making skills about nutritional choices. Unique *Science Applied* boxes answer the questions about how we learn what we know about the science of nutrition and why knowledge changes. *Critical Thinking* exercises included in each chapter allow them to learn the basics of how to think about a problem or situation creatively and critically. A case study is also included in each chapter that builds interest in the material. Each chapter then concludes with a postscript that solidifies the nutritionists' understanding of the links between the science and application.
