The " Pre-established Dependencies " tab of the developer guide for Oracle JDBC with Maven has examples of the dependencies to use for pulling the production jars (see the example above), the production jars with observability instrumentation, the debugging jars, and the debug jars with observability instrumentation.

~~Your Own Way - Oracle JDBC drivers 19.7.0.0 on Maven ...~~

It is platform-independent and does not require any additional Oracle software on the client side. The JDBC Thin driver communicates with the server using SQL*Net to access the Oracle Database. The JDBC Thin driver allows a direct connection to the database by providing an implementation of SQL*Net on top of Java sockets. The driver supports the TCP/IP protocol and requires a TNS listener on the TCP/IP sockets on the database server.
