In October 1934, the Chinese Communist Army found itself facing annihilation, surrounded by hundreds of thousands of Nationalist soldiers. Rather than surrender, 86,000 Communists embarked on an epic flight to safety. Only thirty were women. Their trek would eventually cover 4,000 miles over 370 days. Under enemy fire they crossed highland awamps, climbed Tibetan peaks, scrambled over chain bridges, and trudged through the sands of the western deserts. Fewer than 10,000 of them would survive, but remarkably all of the women would live to tell the tale. Unbound is an amazing story of love, friendship, and survival written by a new master of adventure narrative.

"Digital Preservation for Heritages: Technologies and Applications" provides a comprehensive and up-to-date coverage of digital technologies in the area of cultural heritage preservation, including digitalization, research aiding, conservation aiding, digital exhibition, and digital utilization. Processes, technical frameworks, key technologies, as well as typical systems and applications are discussed in the book. It is intended for researchers and students in the fields of computer science and technology, museology, and archaeology. Dr. Dongming Lu is a professor at College of Computer Science and Technology, Zhejiang University, China. His research area includes digital preservation for cultural heritages and digital media networks. Prof. Yunhe Pan is a member of Chinese Academy of Engineering, and also a professor at College of Computer Science and Technology, Zhejiang University, China. His research area includes digital preservation for cultural heritages, digital library, and intelligent human animation.

A gripping supernatural mystery and romance set in post-Katrina New Orleans. Rebecca couldn't feel more out of place in New Orleans. She's staying in a creepy house with her aunt, who reads tarot cards. And at the snooty prep school, a pack of filthy-rich girls treat Rebecca like she's invisible. Only gorgeous, unavailable Anton Grey gives Rebecca the time of day, but she wonders if he's got a hidden agenda. Then one night, among the oak trees in Lafayette Cemetery, Rebecca makes a friend. Sweet, mysterious Lisette is eager to show Rebecca the nooks and crannies of New Orleans. There's just one catch. Lisette is a ghost.

The Beginner Piano Lessons for Kids Book with Online Video & Audio Access by Jay Wamsted was designed to help the absolute beginning student learn to play the piano or keyboard. This step by step course is designed for elementary school-aged children (ages 5-11) and quickly teaches the student to play songs they will know and love. These lessons start by playing with just the right hand and gradually build to adding the left hand thumb and learning how to play with both hands. Song arrangements were carefully selected to provide an easy transition from learning the basics to covering more interesting rhythms, techniques, and musical ideas. The book features standard music notation for each song and exercise along with fingering notation and hand shifts to make the course easier to learn. This method includes online access to over an hour of video instruction that will help the child play with proper form and timing. The video shows the piano, both hands, and the sheet music on-screen at the same time. The audio tracks allow the student to practice and play along with easy songs at two speeds. The slower speed features just the piano playing the song. The faster version includes vocals and other instruments in a performance-like setting. The combination of book, video, and audio make this the easiest to understand piano course for kids available.Songlist: Mary Had a Little Lamb, Ode to Joy, Hot Cross Buns, Jingle Bells, Oh When the Saints, Twinkle Twinkle Little Star, Rain Rain Go Away, This Old Man, Hush Little Baby, I Have a Little Dreidel, Frere Jacques, Aloette, Yankee Doodle- Watch & Learn, Inc.

In 1930, Bob Brown predicted that the printed book was bound for obsolescence. The time has come, he insisted, to rid the reader of the cumbersome book. He invented a machine that would allow one to read books and any text extremely fast and in a hyper abbreviated form. He called these abbreviated texts, with em dashes replacing words: readies. He envisioned sending the condensed texts through wireless networks. The Readies, describes these eponymously named abbreviated texts and his plans for a reading machine, but since he printed only 150 copies, the volume is practically unknown outside of a small circle of scholars. With this new edition, Craig Saper hopes to introduce Bob Brown's Roving Eye Press books to a new generation of readers.

Water management and disasters, including droughts and floods are becoming very important subjects in the international platforms. This book will provide information about high technology techniques to solve important problems using remote sensing and GIS for topics such as the environmental security, water resources management, disaster forecast and prevention and information security.

A sourcebook to the intersection between art and technology identifies the major female players in this movement, featuring a series of essays exploring the line between these two fields written by artists and promoters who are well respected in their fields. (Fine Arts)

An extraterrestrial being helps a hapless bungler who is lost in space.
