

## Paper Conference 2014

If you ally dependence such a referred **paper conference 2014** book that will come up with the money for you worth, acquire the entirely best seller from us currently from several preferred authors. If you desire to humorous books, lots of novels, tale, jokes, and more fictions collections are moreover launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all book collections paper conference 2014 that we will definitely offer. It is not just about the costs. It's not quite what you compulsion currently. This paper conference 2014, as one of the most vigorous sellers here will agreed be accompanied by the best options to review.

This book presents papers from the International Gear Conference 2014, held in Lyon, 26th-28th August 2014. Mechanical transmission components such as gears, rolling element bearings, CVTs, belts and chains are present in every industrial sector and over recent years, increasing competitive pressure and environmental concerns have provided an impetus for cleaner, more efficient and quieter units. Moreover, the emergence of relatively new applications such as wind turbines, hybrid transmissions and jet engines has led to even more severe constraints. The main objective of this conference is to provide a forum for the most recent advances, addressing the challenges in modern mechanical transmissions. The conference proceedings address all aspects of gear and power transmission technology and range of applications (aerospace, automotive, wind turbine, and others) including topical issues such as power losses and efficiency, gear vibrations and noise, lubrication, contact failures, tribo-dynamics and nano transmissions. A truly international contribution with more than 120 papers from all over the world A judicious balance between fundamental research and industrial concerns Participation of the most respected international experts in the field of gearing A wide range of applications in terms of size, power, speed, and industrial sector

The proceedings of the 1st AAGBS International Conference on Business Management 2014 (AICoBM 2014), held in Penang, Malaysia, gathers 57 refereed papers. They cover areas relating to various aspects of business management and reflect the conference's three main themes (management and marketing, economics and finance, and entrepreneurship) and present original papers contributed by researchers, scholars, professionals and postgraduate students. They address a range of disciplines that encompass each of the main themes. Using basic and applied research findings together with case studies they provide valuable information on current research trends in business management, international business, marketing, economics, finance, Islamic finance and economics, and entrepreneurship.

The present book includes a set of selected extended papers from the sixth International Joint Conference on Computational Intelligence (IJCCI 2014), held in Rome, Italy, from 22 to 24 October 2014. The conference was composed by three co-located conferences: The International Conference on Evolutionary Computation Theory and Applications (ECTA), the International Conference on Fuzzy Computation Theory and Applications (FCTA), and the International Conference on Neural Computation Theory and Applications (NCTA). Recent progresses in scientific developments and applications in these three areas are reported in this book. IJCCI received 210 submissions, from 51 countries, in all continents. After a double blind paper review performed by the Program Committee, 15% were accepted as full papers and thus selected for oral presentation. Additional papers were accepted as short papers and posters. A further selection was made after the Conference, based also on the assessment of presentation quality and audience interest, so that this book includes the extended and revised versions of the very best papers of IJCCI 2014. Commitment to high quality standards is a major concern of IJCCI that will be maintained in the next editions, considering not only the stringent paper acceptance ratios but also the quality of the program committee, keynote lectures, participation level and logistics.

This book constitutes the proceedings of the Third International Conference on Analysis of Images, Social Networks and Texts, AIST 2014, held in Yaketerinburg, Russia, in April 2014. The 11 full and 10 short papers were carefully reviewed and selected from 74 submissions. They are presented together with 3 short industrial papers, 4 invited papers and tutorials. The papers deal with topics such as analysis of images and videos; natural language processing and computational linguistics; social network analysis; machine learning and data mining; recommender systems and collaborative technologies; semantic web, ontologies and their applications; analysis of socio-economic data.

This book constitutes the refereed proceedings of the 12th International Conference on Intelligent Tutoring Systems, ITS 2014, held in Honolulu, HI, USA, in June 2014. The 51 revised full papers, 45 short papers and 27 posters presented were carefully viewed and selected from 177 submissions. The specific theme of the ITS 2014 conference is "Creating fertile soil for learning interactions". Besides that, the highly interdisciplinary ITS conferences bring together researchers in computer science, learning sciences, cognitive and educational psychology, sociology, cognitive science, artificial intelligence, machine learning and linguistics. The papers are organized in topical sections on affect; multimodality and metacognition; collaborative learning; data mining and student behavior; dialogue and discourse; generating hints, scaffolds and questions; game-based learning and simulation; graphical representations and learning; student strategies and problem solving; scaling ITS and assessment.

This book constitutes the thoroughly refereed post-conference proceedings of the 17th International Conference on Information Security and Cryptology, ICISC 2014, held in Seoul, South Korea in December 2014. The 27 revised full papers presented were carefully selected from 91 submissions during two rounds of reviewing. The papers provide the latest results in research, development and applications in the field of information security and cryptology. They are organized in topical sections on RSA security, digital signature, public key cryptography, block ciphers, network security, mobile security, hash functions, information hiding and efficiency, cryptographic protocol, and side-channel attacks.

This book constitutes the refereed proceedings of the 11th International Conference on Cooperative Design, Visualization, and Engineering, CDVE 2014, held in Seattle, WA, USA, in September 2014. The 33 full and 10 short papers presented were carefully reviewed and selected from 78 submissions. The papers cover topics such as cloud technology; the use of cloud for manufacturing, re-source selection, service evaluation, and control; methods for processing and visualizing big data created by the social media, such as Twitter and Facebook; real-time data about human interaction; sentiment analysis; trend analysis; location-based crowdsourcing; effective teamwork; cooperative visualization.

This book constitutes the thoroughly refereed proceedings of the Fourth International Conference on Arts and Technology, ArtsIT 2014, held in Istanbul, Turkey, in November 2014. The 17 revised full papers presented were carefully selected and reviewed from numerous submissions. ArtsIT has become a leading scientific forum for the dissemination of cutting-edge research results in the area of arts, design and technology. The papers focus on IT technologies, artists, designers and industrial members and offer content creators tools that expand the means of expression of the traditional design field.
