number 6379, for example, is made of...

~~What is place value? — BBC Bitesize~~

What Is Place Value? Place value refers to the value of each digit in a number. For example, the number 753 has three "places"—or columns—each with a specific value. In this three-digit number, the 3 is in the "ones" place, the 5 is in the "tens" place, and the 7 is in the "hundreds" place.

~~Understanding Place Value, Basic Math Concepts~~

When dividing 6 by ten, the number moves one place to the right and becomes 0.6. If you divide 6 by 100, the number moves two places to the right and becomes 0.06. In Year 5, children need to use their knowledge of place value to work out sums and differences of decimals. For example, they would need to know that adding 0.8 and 0.4 results in 'crossing 1' because the answer is 1.2.

~~Place value explained for primary school parents ...~~

Place Value. Place value helps us determine the value of numbers. Our (base-10) number system contains numerals (or digits) only from 0 through 9, but we often need to use numbers greater than 9. We show numbers greater than 9 by using place value, which means that the value of a digit is determined by its place in the entire number.

~~Explain That: Place Value | Education World~~

What is place value? Place value refers to the value of each digit within a number. In the number $\{3,147,286\}$ the digit $\{2\}$ has a value of $\{200\}$ (two hundred) and the digit $\{3\}$...

~~Using place value to solve problems. Year 2, 2 lessons~~
...

When one is having a dispute with a family member over money, it is important to be able to distinguish between facts (how much one is bringing in and how much one is spending, for example), and values (what money should be spent on and how much). Such decisions are value choices--one person may value luxuries, while the other values frugality.

~~Distinguishing Facts from Values | Beyond Intractability~~

the value and place value of 2 in 25 is tens and 20. the value and place value of 5 in 25 is units/ones and 5. What is the value and place value of 583492167? The value is exactly 583,492,167. There...

~~What are facts about place value? — Answers~~

The place value definition in mathematics refers to the arithmetic value associated with each digit corresponding to its place in a number. For example, the number “ 58 ” has the digit “ 8 ” at the unit ’ s place and “ 5 ” at the tens place.
