What ' s Wrong with China is the most cogent, insightful and penetrating examination I have read on the paradoxes and self-deceptions of Modern China, written by someone who has lived in the country and dealt with it day to day for decades. This book will be hated by the commissars, because it is a triumph of analysis and good sense. —PAUL THEROUX I sure

wish I'd read this book before heading to China—or Chinatown, for that matter. China runs on an entirely different operating system—both commercial and personal. Midler's clear, clever analysis and illuminating, often hilarious tales foster not only understanding but respect. —MARY ROACH From the Back Cover What's Wrong with China is the widely anticipated follow-up to Paul Midler's Poorly Made in China, an exposé of China manufacturing practices. Applying a wider lens in this account, he reveals many of the deep problems affecting Chinese society as a whole. Once again, Midler delivers the goods by rejecting commonly held notions, breaking down old myths, and providing fresh explanations of lesser-understood cultural phenomena.

A Year Without "Made in China" provides you with a thought-provoking and thoroughly entertaining account of how the most populous nation on Earth influences almost every aspect of our daily lives. Drawing on her years as an award-winning journalist, author Sara Bongiorno fills this book with engaging stories and anecdotes of her family's attempt to outrun China's reach—by boycotting Chinese made products—and does a remarkable job of taking a decidedly big-picture issue and breaking it down to a personal level.

Doing business in China is tougher than you think. Not only is the culture vastly different, but China's experience in manufacturing is still

developing. It will be a few years before the majority of manufacturers are up to world standards. In the meantime, quality, contract laws, schedules and logistics must be closely monitored. As a result, the things Westerners must do to be successful are far different from dealing with American or European manufacturers. The best way to quickly come up to speed on these differences and how to handle them is to learn from the experience of others. Through over 20 extraordinary executive interviews, Rosemary Coates captured the essence of sourcing and manufacturing in China. '42 Rules for Sourcing and Manufacturing in China (2nd Edition)' is a pragmatic approach that every businessperson headed to China must read. For business people who are experienced in doing

business in China, or for first-time visitors, this book will provide valuable insights from real executives and experts. These executives offer their personal experiences and recommendations about sourcing and manufacturing in China. Going beyond simple cultural do's and don'ts, you will discover: how business is really done how you can make things happen in China the mistake westerners often make, and how to avoid them what made these executives successful Based on her 25 years of supply chain experience, much of it spent living and working across Asia, Rosemary Coates has become an expert on doing business in China. Her own personal experiences in China are interwoven into this book.

If you look carefully at how things are actually made in China - from shirts to toys, apple juice to oil rigs - you see a reality that contradicts every widely-held notion about the world's so-called economic powerhouse. From the inside looking out, China is not a manufacturing juggernaut. It's a Lilliputian. Nor is it a killer of American jobs. It's a huge job creator. Rising China is importing goods from America in such volume that millions of U.S. jobs are sustained through Chinese trade and investment. In *Unmade in China*, entrepreneur and Georgetown University business professor Jeremy Haft lifts the lid on the hidden world of China's intricate supply chains. Informed by years of experience building new companies in China, Haft's unique, insider's view reveals a startling picture of an

economy which struggles to make baby formula safely, much less a nuclear power plant. Using firm-level data and recent case studies, *Unmade in China* tells the story of systemic risk in Chinese manufacturing and why this is both really bad and really good news for America.

A blueprint for doing business successfully in the rapidly growing Chinese consumer market shares insight into China's remarkable emergence as a global economic power, the nation's seemingly contradictory business practices, and the experiences of high-profile foreign companies and businesspeople. Reprint. 40,000 first printing.

A Most-Anticipated Book of the Year:
Newsweek * Refinery29 “ Moving

and powerful.” —Chris Hedges, Pulitzer Prize-winning journalist and author In 2012, an Oregon mother named Julie Keith opened up a package of Halloween decorations. The cheap foam headstones had been \$5 at Kmart, too good a deal to pass up. But when she opened the box, something fell out that she wasn't expecting: an SOS letter, handwritten in broken English by the prisoner who'd made and packaged the items. In *Made in China*, investigative journalist Amelia Pang pulls back the curtain on the labor camps that create the home goods we buy at Kmart, the fast fashion we buy at H&M, and a shocking number of other products besides. The book follows the life of Sun Yi, the Chinese engineer who wrote the note after finding himself a political prisoner, locked in a gulag for

Joining a forbidden meditation practice and campaigning for the freedom to do so. There he worked alongside petty criminals, civil rights activists, and anyone else the Chinese government decided to “reeducate,” carving foam gravestones and stitching clothing for more than fifteen hours a day. In chasing this story, journalist Amelia Pang has conducted extensive interviews with Sun Yi and the people who knew him. She also identified and interviewed others who endured similar horrors, and who inflicted them. And she traveled to China to follow falsified supply chains herself, tracking trucks from labor camps to warehouses. The story she uncovers is a call to action, urging the American consumer to ask more questions and demand more answers from the companies they

Online Library Poorly Made In China An Insiders Account Of The China Production Game

China is hot. The world sees a glorious future for this sleeping giant, three times larger than the United States, predicting it will blossom into the world's biggest economy by 2010. According to Chang, however, a Chinese-American lawyer and China specialist, the People's Republic is a paper dragon. Peer beneath the veneer of modernization since Mao's death, and the symptoms of decay are everywhere: Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing's cautious reforms have left the country stuck midway between communism and capitalism,

Online Library Poorly Made In China An Insiders

Chang writes. With its impending World Trade Organization membership, for the first time China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse. Covering subjects from party politics to the Falun Gong to the government's insupportable position on Taiwan, Chang presents a thorough and very chilling overview of China's present and not-so-distant future.
