The 1973.5 911 T, with its 2.4 liter engine shown above, was the first CIS fuel system produced by Porsche and the first CIS system utilized for a passenger vehicle. In '74, the CIS continued with the upgrade to the 2.7 liter engine and several changes were incorporated. Intake pipes changed from bent tubing to cast intake runners.

MAINTENANCE AND ADJUSTMENT. The two primary adjustments for the CIS are the idle speed and the mixture adjustment. The mixture can be adjusted by turning a small hex screw that is located in-between the fuel distributor and the sensor plate. Use a long hex key, or the special mixture adjustment tool to turn the screw.
