More than any other psychology textbook, Don and Sandra Hockenbury ' s Psychology relates the science of psychology to the lives of the wide range of students taking the introductory course. Now Psychology returns in a remarkable new edition that shows just how well-attuned the Hockenburys are to the needs of today ' s students and instructors. Psychology began with a basic idea: combine scientific authority with a narrative that engages students and relates to their lives. From decades of experience teaching, the Hockenburys created a book filled with cutting-edge science and real-life stories that draw students of all kinds into the course.

Kadence Mulligan's star was rising. She and her best friend, Lauren DeSanto, watched their songs go viral on YouTube, then she launched a solo career when a nasty throat infection paralyzed Lauren's vocal chords. Everyone knows Lauren and Kadence had a major falling-out over Kady's boyfriend. But Lauren knows how deceptive Kadence could be sometimes. And nobody believes Lauren when she claims she had nothing to do with the disappearance. Or the blood evidence... As the town and local media condemns Lauren, she realizes the only way to clear her name is to discover the truth herself. Lauren slowly unravels the twisted life of Kadence Mulligan and sees that there was more to her than she ever knew. But will she realize she's unknowingly playing a part in an elaborate game to cover up a crime before it's too late?

This is the textbook only without Launchpad. With an author team equally at home in the classroom, in the lab, or on the bestseller list, this book is written to keep students turning the pages. It offers expert coverage of psychology ' s scientific foundations, but communicates with students in a style that ' s anything but that of a typical textbook. Introducing Psychology keeps the level of engagement high, with quirky and unforgettable examples, and reminders throughout that the critical thinking skills required to study psychology will serve students well throughout their lives. The fourth edition has been completely retooled for the classroom. For the first time, each chapter section begins with Learning Outcomes to guide students ' learning. These outcomes represent the big picture, so readers come away with more than a collection of facts. The new edition also includes the new 'A World of Difference' feature, which highlights interesting and important research on individual differences such as sex, gender, culture and ethnicity in understanding the breadth of psychology. Introducing Psychology can also be purchased with the breakthrough online resource, LaunchPad, which offers innovative media content, curated and organised for easy assignability. LaunchPad's intuitive interface presents quizzing, flashcards, animations and much more to make learning actively engaging.
