The QHY5-II Series uncooled cameras fit in a standard 1.25-inch eyepiece holder and have an adjustable location ring for confocality with an eyepiece. They are ideal for use as low-weight autoguiders or planetary cameras where short exposures are typical. The QHY5-II series cameras come in very small but powerful packages!

Qhy5 Autoguider Price -

blazingheartfoundation.org

I bought the QHY5 for autoguiding my astrophotos, but since it is also capable of capturing images of brighter astronomical objects, I gave it a try as a camera for lunar imaging. A few weeks ago our association (VAA) bought a Imaging Source DMK21 camera especially for lunar and planetary imaging.

Camera comparison QHY5 / DMK21
QHYCCD designs and manufactures world-leading astronomical cameras, ranging from entry-level to professional, CMOS and CCD, front-illuminated and back-illuminated, specially crafted for amateur and professional astronomers worldwide.

Download - QHYCCD Astronomical Cameras

Like the ZWO 'Mini' cameras, this camera can be used as an autoguider or lunar/planetary camera and it comes in a small package about the size of an 1.25" eyepiece. It also includes an ST4 port and USB2.0 interface. In 2016, QHYCCD released an upgraded QHY5-III series of cameras with USB3.0 interface.
