Even modest telescopes such as a small – 3-inch (80mm) – astronomical refractor or Maksutov can provide scientifically useful data. This is certainly true, but where to start? Real Astronomy with Small Telescopes tells you everything you'll need to know about how to get started on "real" astronomy using a small telescope (and ideally a digital camera), and make a real contribution to our scientific knowledge.

Real Astronomy with Small Telescopes - Gainer, Michael ...

This small telescope offers amazing value for money. It's made by Celestron, so it has an exemplary astronomy pedigree, but, at less than \$100, it is really affordable. It's the cheapest telescope for adults on this list and it still offers a really impressive range of features, which is why we've made it our best value product.
