Safety in Design JULY 2016 The new Health and Safety at Work Act 2015 ( “ the Act ” ), which came into force on 4 April 2016, places significant personal duties on those in positions of responsibility to ensure that their employees and workplaces are given the “ highest level of protection ” . Why is Safety in Design important?

Safety in Design - Designers Institute

Safe design is about integrating hazard identification and risk assessment methods early in the design process, to eliminate or minimise risks of injury throughout the life of a product. This applies to buildings, structures, equipment and vehicles. Of 639 work-related fatalities from 2006 to 2011, one-third (188) were caused by unsafe design or design-related factors contributed to the ...
