Software Configuration Management | Complete Guide to SCM

Software configuration management (SCM) is a set of processes, policies, and tools that organizes the development process. It simultaneously maintains the current state of the software (called the "baseline"), while enabling developers to work on new versions for features or fixes.

Software Configuration Management: Patterns, Best ...

In Software Engineering, Software Configuration Management (SCM) is a process to systematically manage, organize, and control the changes in the documents, codes, and other entities during the Software Development Life Cycle. The primary goal is to increase productivity with minimal mistakes. SCM is part of cross-disciplinary field of configuration management and it can accurately determine who made which revision.

Software Configuration Management in Software Engineering

This Configuration Guide template will help you to: Identify the prerequisites and system requirements for the hardware, software, or network you intend to configure. Configure the necessary security settings Document the configuration tasks that need to be performed as part of the system deployment.

Configuration Guide Template (MS Word) – Templates, Forms ...

Software change and configuration management provide a framework for managing changes to software as it is developed, maintained, and eventually retired. Some organizations treat this as one discipline; the exam treats configuration management and change management as separate but related disciplines.

Software Configuration - an overview | ScienceDirect Topics

Software configuration management is one of the primary concerns during system implementation and maintenance. Fortunately, there are many available tools, beginning with systems such as Revision Control System (RCS) and Concurrent Versions System (CVS), which have been followed by newer tools such as Subversion (SVN), Mercurial (Hg) and Git.

Software Configuration Management - an overview ...

Applies to: Configuration Manager (current branch) Your organization's IT admin uses Software Center to install applications, software updates, and upgrade Windows.
