The Spitfire is the world's most iconic aeroplane. Coming into its own during the Battle of Britain, it became famous during the Second World War as the only plane that could match the enemy fighters in the sky. Yet, even today, the history of the Spitfire contains many hitherto hidden or little-known stories of the men and women behind the plane; not only the gifted creators and inventors who brought the Spitfire to life, or the brave fighter pilots from many countries who triumphed in battle, but also the thousands of other people whose lives were affected by their personal connection to it - engineers, ground crew, factory or office workers, and their families. The Spitfire Story recounts the memories and stories of these people, from the birth of the iconic Spitfire in the 1930s to the present day.

Spitfire Stories, published in association with Imperial War Museums, is a fascinating anthology of first-hand stories from Spitfire heroes and heroines of the Second World War. The Spitfire is the world's most iconic aeroplane. Coming into its own during the Battle of Britain, it became famous during the Second World War as the only plane that could match the enemy fighters in the sky. Yet, even today, the history of the Spitfire contains many hitherto hidden or little-known stories of the men and women behind the plane; not only the gifted creators and inventors who brought the Spitfire to life, or the brave fighter pilots from many countries who triumphed in battle, but also the thousands of other people whose lives were affected by their personal connection to it - engineers, ground crew, factory or office workers, and their families. Spitfire Stories recounts the memories and stories of these people, from the birth of the iconic Spitfire in the 1930s to the present day. Among these accounts is the extraordinary tale of the fighter pilot who only discovered, fifty years on, the tragic truth of his last Spitfire flight, the businessman whose blank cheque changed the course of the war, the ninety-five-year-old Royal Air Force engineer who was determined to be reunited with his beloved Spit before he died, and the little girl who inspired the plane's creation - and went on to marry a movie star. Using documents, letters and photographs from the Imperial War Museums' unparalleled archive, plus exclusive first-hand interviews, these stories of the Spitfire are a revelatory collection of small but significant histories, to be treasured by all who love and admire the iconic plane.

Through the darkest days of the Second World War, an elite group of courageous, gifted women risked their lives as courier pilots, flying Lancaster Bombers, Spitfires and many other aircraft in hundreds of perilous missions across the country. The role of these women pilots of the Air Transport Auxiliary was to deliver the planes to the male RAF pilots who would take them into battle, dangerous work which the women carried out unarmed, without radios. Fifteen would lose their lives. In *The Female Few*, five of these astonishingly brave women tell their stories for the first time, awe inspiring tales of incredible risk, tenacity and sacrifice. Their spirit and fearlessness in the face of death still resonates down the years, and their

File Type PDF Spitfire Stories True Tales From Those Who Designed Maintained And Flew The Iconic Plane

accounts reveal a forgotten chapter in the history of the Second World War. As Yvonne Macdonald, now 90 and living in Cape Cod, says: 'It was a kind of freedom you never get any other way, it was as if you had wings sewn on your back. A lot of people here in Cape Cod don't even know I was in World War Two. Or what I did.' They do now.

How to fly the legendary fighter plane in combat using the manuals and instructions supplied by the RAF during the Second World War.

This WWII biography recounts the heroic contributions of a female pilot who flew Spitfires, Hurricanes and Wellington Bombers for the RAF. A farmer's daughter from Oxfordshire, Mary Ellis fell in love with flying at the age of eleven, when she rode in a biplane at a flying circus. Already a licensed pilot by the time the Second World War broke out, Mary joined the Air Transit Auxiliary in 1941. As a ferry pilot, she transported aircraft for the Royal Air Force, including more than four hundred Spitfires and seventy-six different kinds of aircraft. After the war, Mary accepted a secondment to the RAF as one of the first pilots to fly the new Gloster Meteor, Britain's first fighter jet. By 1950, she became Europe's first female air commandant. In this authorized biography, Mary and biographer Melody Foreman vividly recount her action-packed career spanning almost a century of aviation. Mary says: I am passionate for anything fast and furious. I always have been since the age of three and I always knew I would fly. The day I stepped into a Spitfire was a complete joy and it was the most natural thing in the world for me.

'The best book you will ever read about Britain's greatest warplane.' Patrick Bishop, bestselling author of *Fighter Boys*. 'A rich and heartfelt tribute to this most iconic British machine. By focussing on the men (and women) who flew the Spitfire, John Nichol has brought a fresh and powerful perspective to the story. And by recording their bravery, humility, camaraderie, tragedy and sheer joy in flying their beloved Spits he has done them - and us - a valuable service' Rowland White, bestselling author of *Vulcan 606* 'A superb and compelling book. Brilliantly written with some incredible and astonishing stories; it is gripping, moving, emotional and sometimes humorous - just perfect' Squadron Leader (Ret) Clive Rowley, former Officer Commanding RAF Battle Of Britain Memorial Flight 'A superb journey through the remarkable tale of that British icon, the Spitfire. Brilliantly and engagingly written, this is the most readable story of the aircraft and her pilots that I have ever had the pleasure to read in a period spanning some forty-odd years of personal study and research. Truly stunning.' Andy Saunders, Editor, *Britain at War Magazine*. 'This is not just a tale of heroism in the skies . . . This is a tale of victory . . . Magnificently told in lip-biting detail' - *Daily Mail (The Red Line)* The perfect complementary narrative to the bestselling memoir by Geoffrey Wellum - *First Light*. *Achtung, Spitfire!* The iconic Spitfire found fame during the darkest early days of World War II. But what happened to the redoubtable fighter and its crews beyond the Battle of Britain, and why is it still so loved today? In late spring 1940, Nazi Germany's domination of Europe had looked unstoppable. With the British Isles in easy reach since the fall of France, Adolf Hitler was convinced that Great Britain would be defeated in the skies over her southern coast, confident his Messerschmitts and Heinkels would outclass anything the Royal Air Force threw

File Type PDF Spitfire Stories True Tales From Those Who Designed Maintained And Flew The Iconic Plane

at them. What Hitler hadn't planned for was the agility and resilience of a marvel of British engineering that would quickly pass into legend - the Spitfire. Bestselling author John Nichol's passionate portrait of this magnificent fighter aircraft, its many innovations and updates, and the people who flew and loved them, carries the reader beyond the dogfights over Kent and Sussex. Spanning the full global reach of the Spitfire's deployment during WWII, from Malta to North Africa and the Far East, then over the D-Day beaches, it is always accessible, effortlessly entertaining and full of extraordinary spirit. Here are edge-of-the-seat stories and heart-stopping first-hand accounts of battling pilots forced to bail out over occupied territory; of sacrifice and wartime love; of aristocratic female flyers, and of the mechanics who braved the Nazi onslaught to keep the aircraft in battle-ready condition. Nichol takes the reader on a hair-raising, nail-biting and moving wartime history of the iconic Spitfire populated by a cast of redoubtable, heroic characters that make you want to stand up and cheer. 'A rich and heartfelt tribute to this most iconic British machine. By focussing on the men (and women) who flew the Spitfire, John Nichol has brought a fresh and powerful perspective to the story.' - Rowland White - author of Vulcan 607

Exciting, first-hand accounts from Lightning aircrews—the sequel to the bestselling book from the author of the Hunter Boys and Phantom Boys volumes. Lightning Boys 2 is a must-have companion to the first collection and continues the theme of tales from pilots and other crew connected with this iconic aircraft, giving a rare insight into postwar fighter operations. In 20 separate stories to intrigue, amaze, and amuse, the book has also been compiled and written by Richard Pike. The reader is taken to situations as diverse as intercepting 60-plus enemy aircraft, a desperate struggle in a cockpit flooded by tropical downpours, the difficulties of being affected by sudden and painful toothache at high altitude, and the curious encounter with an unidentified flying object. Yet another chapter paints a dramatic reconstruction of a scene in Germany when a Lightning, having entered an inadvertent, out-of-control spin, began an earthwards plunge towards a town center.

This book tells the tale of the brilliant aerodynamicist Beverley Shenstone MASC, HonFRAes, FAIAA,AFIAS, FCASI, HonOSTIV. As R.J. Mitchells chief aerodynamicist, it was Shenstone who designed the Spitfires wing the wing that gave the Spitfire it crucial advantage in the Battle of Britain and beyond. A quiet man, Shenstone never sought glory for his work, yet in recent years he has been credited as the man who persuaded Mitchell to adopt the ellipse a modified ellipse that was unique in its shape and its combined use of two integrated aerofoil sections. Shenstones knife-edge shape reached far back into early aeronautics for its inspiration. This book also names the other forgotten Spitfire design contributors who were Mitchells men Mr Faddy, Mr Fear, Mr Fenner, Mr Shirvall, a Prof Howland and others. Intriguingly, Shenstone had left his native Canada and early training as an RCAF pilot, to study at Junkers and then under the father of the delta wing Alexander Lippisch in Germany in the early 1930s. There, he became immersed in delta wings and flying wings. He also became a glider pilot. The story of how Beverley came to be in the right place at the right time is revealed for the first time. So too are the enigmatic tales of his involvement with the military, the intelligence world, Lord Beaverbrook, the USAF, and Canadian aviation. During the war Shenstone worked at the top secret Wright Patterson air force base and was involved with the Air Ministry and the pro-British movement in America when Shenstone worked for Air Chief Marshal Sir Wilfrid Freeman, the

File Type PDF Spitfire Stories True Tales From Those Who Designed Maintained And Flew The Iconic Plane

unsung hero behind British defence procurement. Shenstone achieved high office a President of the Royal Aeronautical Society, technical director at BOAC, chief engineer at BEA and a consultant to several aircraft makers. He was courted by Avro, de Havilland and Vickers, and was the force behind the renaissance of human-powered flight. Using exclusive access to his family documents, his unpublished autobiography and many notes and stories, as well as forensic research, this book details for the first time, a new twist to the Spitfires story and the secrets of its advanced science. A tale of design and military intelligence reveals a story of a man whose name should be more widely known in the UK, Canada and the aviation world.

Why would the well-bred daughter of a New England factory-owner brave the U-boat blockades of the North Atlantic in the bitter winter of 1941? What made a South African diamond heiress give up her life of house parties and London balls to spend the war in a freezing barracks on the Solent? And why did young Margaret Frost start lying to her father during the Battle of Britain? They - and scores of other women - weren't allowed to fly in combat, but what they did was nearly as dangerous. Unarmed and without instruments or radios, they delivered planes for the Air Transport Auxiliary to the RAF bases from which male pilots flew into battle. At the mercy of the weather and any long-range enemy aircraft that pounced on them, dozens of these women died, among them Amy Johnson, Britain's most famous flyer. But the survivors shared four unrepeatable years of life, adrenaline and love. The story of this 'tough bunch of babes' (in the words of one of them) has never been told properly before. The author has interviewed all the surviving women pilots, who came not just from the shires of England, but also from the U.S.A, Chile, Australia, Poland and Argentina. Paid £ 6.00 a week, they flew - in skirts - up to 16 hours a day in 140 different types of aircraft, though most of them liked spitfires best.

This is the story of an exceptional test pilot and RAF and Fleet Air Arm pilot, Jeffrey Quill, who took charge of some of the most important military aircraft of his time. Jeffrey Quill, was commissioned in the RAF in 1931. He joined Vickers Aviation in 1936, and rose to become Chief Test Pilot at Supermarine. Best remembered for his work on the Spitfire, with which his name is inextricably linked, he played a major part in the testing of the prototype and the entire development of the aircraft. Starting with lively descriptions of the Royal Air Force in the mid 1930s, Jeffrey Quill moves on to cover his fascinating test flying experiences where he took charge of some of the most important military aircraft of that time. He flight-tested every variant of the immortal Spitfire, from its experimental, prototype stage in 1936 when he worked with its chief designer, RJ Mitchell, to the end of its production in 1948. Using his first-hand experience of combat conditions fighting with 65 Squadron at the height of the Battle of Britain, Jeffrey Quill helped to turn this elegant flying machine into a deadly fighter aircraft.
