The straight-wireconcept W. Bonham Magness, D.D.S. Houston,Texas The title, "straight-wireconcept, " was developed purposely to emphasize the term concept.The concept or idea to be developed is that a more consistent, more ideal result can be obtained with less physical and mental drain on the operator, in less over-all treatment time, and with less discomfort to the patient, with the use of an appliance which places the primary source of tooth control within the attachment rather than in ...

A straight wire from C to X is deflected 6 units to engage A or B with the expectation that A or B would move to ideal position X. If the stiffness of the arch wire produces 1 ounce of force per unit of deflection, it will exert 6 ounces of force when engaged to move A or B toward position X.

Abstract. Qualities of the Straight-Wire Appliance are summarized, and its background and clinical use reviewed. A need for objectively established treatment goals impelled a study of naturally excellent occlusions. Consistent characteristics were identified. Their apparent suitability for most patients indicated the feasibility of a new appliance, preprogrammed to take patients to such goals with reduced wirebending, shorter treatment time and chair time, and greater consistency and ...
