Analysis I Terence Tao. This is part one of a
two-volume book on real analysis and is
intended for senior undergraduate students of
mathematics who have already been exposed to
calculus. The emphasis is on rigour and
foundations of analysis. Beginning with the
construction of the number systems and set
theory, the book discusses the basics of
analysis (limits, series, continuity ...

can make them better, e.g. they're used to gather information about the pages you visit and how many clicks you need to accomplish a task.

Math-learning/Analysis II Terence Tao.pdf at master ...

The book, especially volume 1, is quite basic: The first 150 pages are devoted to constructing the real numbers, and fundamentals (set theory, functions). The exercises aren't too bad, and the style of writing is nice. In volume 1 there are a few typos, and in Volume 2 there are a lot of typos (check Tao's UCLA page for an errata). My main complaint about the book is that Tao defines things ...
