The fragility of modern society As our civilization has become more and more complex, it has become increasingly vulnerable to disasters. We see this whenever there are power cuts or transportation failures due to severe storms. If electricity should fail for a very long period of time, our complex society would cease to function.

This book argues that knowledge is now central to the modern economy and its productive processes. It is also essential for social relations, social cohesion and conflict resolution. We have moved from a society based around heavy commodities to symbolic goods, from situated markets to non-place-specific locations, from machines to software and from things to ideas.

Many of the theoretical efforts of the last decades that attempt to come to grips with the unique features of the trajectory of modern societies are couched in the past tense. That is, the developments identified are the signature of an era in which the observers find themselves. It is typically described as if closure had already been achieved.
