The Heston Model University College
London

The Heston Model is one of the most widely used stochastic volatility (SV) models today. Its attractiveness lies in the powerful duality of its tractability and robustness relative to other SV models. This project initially begun as one that addressed the calibration problem of this model.

The Heston Model: A Practical
Approach

In finance, the Heston model, named after Steven Heston, is a mathematical model describing the evolution of the volatility of an underlying asset. It is a stochastic volatility model: such a model assumes that the volatility of the

Heston is a suburban area and part of the Hounslow district in the London Borough of Hounslow. The residential settlement covers a slightly smaller area than its predecessor farming village, 10.8 miles (17.4 km) west south-west of Charing Cross and adjoins the M4 motorway but has no junction with it; Heston also adjoins the Great West Road, a dual carriageway,
