The authors invited more than 100 journalists worldwide to use photographs, charts and essays to explore the world of big data and its growing influence on our lives and society.

This hilarious, highly original series, which so astutely captures the odd preoccupations of middle schoolers, will appeal to the many fans of the Origami Yoda series and such gross-out classics as How to Eat Fried Worms and Freckle Juice. Lyle Hertzog and his friends Marilla and Dave are the Qwikpick Adventure Society, three kids who seek out adventure in their seemingly quiet hometown of Crickenburg. On the hunt for their next big mission—something to top the Fountain of Poop, if that’s even possible—the kids overhear a construction worker telling his buddies about a rat with a human face he saw in the basement of an old research facility. The decision is unanimous: the next adventure for the Qwikpick Society is on! But when their trip to find the rat doesn't go quite as expected, the trio gets into big trouble. Will the second adventure for the Qwikpick Society also be their last?

Just as nuclear fusion produces massive energy from combining two nuclei, a fusion in business, technology, and the arts can release massive value—creating whole new companies, industries, and human capabilities. Examples of the fusion technique for high-value, radical innovation are presented in this unique collection of stories about innovating across industries, fields, organizational silos, nations, social class, and more. This book is the result of a global research study of 30 world-class innovators who have collectively created billions of dollars’ worth of business value, as well as new advances in the arts and sciences that bring joy to the world and can save millions of lives. Insights from the journeys of the innovators provided in this book will help leaders, organizations, and individuals succeed in their innovative endeavors. In addition, each chapter provides a link to a short video that provides further insights, mostly from the innovators themselves. Innovation through Fusion is essential reading for individual innovators who would like to create the future; teams and organizations that need to craft radical or high-value innovations (especially across industries or organizational silos); and leaders concerned about declining returns on innovation efforts and uncertain about organizational survival in a disruptive world. The author provides a new model of lateral innovation—useful both as an innovation process and as a framework to assess your lateral innovation capabilities. The book is replete with value-creation examples of lives saved, billions of dollars of savings/growth, and new products, services, and companies, as well as stories of leading lateral innovators—who they are and how they succeeded. For the author’s talk on Fusion at EmTech Asia/MIT Technology Review, featured in Asian Scientist magazine, click here: <https://www.asianscientist.com/2019/04/features/ipi-singapore-emtech-asia-cj-meadows-innovation/>

This volume collects essays from academics and practitioners from a diversity of areas and perspectives in order to discuss water security at various levels and to illuminate the central idea of water security: its focus on the individual. Beginning with the big picture, this book aims to illustrate the depth of the water security crisis and its interconnections with other aspects of societal development. It particularly draws a connection to the 2030 Agenda for Sustainable Development, and discusses that challenges faced in meeting the 17 sustainability development goals (SDG) by the year 2030. Moving from international to domestic and community perspectives, this book provides a unique analysis of issues and solutions to the water issues we face today in light of the ever looming global changes brought on by climate change. Over the past few decades the recognition of our common need for water has increased, as policymakers have sought to place more focus on the individual within policy. After the recognition of water and sanitation as a fundamental human right by the United Nations General Assembly in 2010, there is increasing recognition of the individual as the building block for the struggle for water security. This reality also intersects with adverse impacts of global climate change, and the book responds to the broader question: will clean and safe water be available where we need it and when we need it in the future?

In this social and cultural history of Czechoslovakia's "gentle revolution," James Krapfl shifts the focus away from elites to ordinary citizens who endeavored—from the outbreak of revolution in 1989 to the demise of the Czechoslovak federation in 1992—to establish a new, democratic political culture. Unique in its balanced coverage of developments in both Czech and Slovak lands, including the Hungarian minority of southern Slovakia, this book looks beyond Prague and Bratislava to collective action in small towns, provincial factories, and collective farms. Through his broad and deep analysis of workers’ declarations, student bulletins, newspapers, film footage, and the proceedings of local administrative bodies, Krapfl contends that Czechoslovaks rejected Communism not because it was socialist, but because it was arbitrarily bureaucratic and inhumane. The restoration of a basic "humanness"—in politics and in daily relations among citizens—was the central goal of the revolution. In the strikes and demonstrations that began in the last weeks of 1989, Krapfl argues, citizens forged new symbols and a new symbolic system to reflect the humane, democratic, and nonviolent community they sought to create. Tracing the course of the revolution from early, idealistic euphoria through turns to radicalism and ultimately subversive reaction, Revolution with a Human Face finds in Czechoslovakia’s experiences lessons of both inspiration and caution for people in other countries striving to democratize their governments.

The original edition of Emotion in the Human Face, published in 1972, was the first volume to evaluate and integrate all the research on facial expression of emotion since Darwin's The Expression of Emotions in Man and Animals was published in 1872. It presented a detailed, critical discussion of research involving the face and emotion, focusing on the complex conceptual and methodological issues involved, and settling many past controversies, such as whether the face provides accurate information about emotion, and whether some facial expressions are universal. This special Malor Books edition includes a new Preface, three additional chapters, and a new conclusion summarizing Ekman's final views on the field that he has played such a large part in creating. Contributors to this work include: Paul Ekman, Phoebe Ellsworth, Wallace V. Friesen, Joseph C. Hager, Harriet Oster, Maureen O'Sullivan, William K. Redican and Silvan S. Tomkins.

'TEMPLETON CAN ALWAYS BE RELIED ON TO PROVIDE A WELL-WRITTEN, CLEVERLY PLOTTED WHODUNNIT' THE TIMES Beatrice Lacey is passionate about two things: Human Face, the charity for Third World children she helped to found, and its co-founder, Adam Carnegie. Her devotion to Adam has led her to turn a blind eye to strange goings-on over the years, including the endless merry-go-round of 'housekeepers' whose tenure at the charity headquarters is sometimes remarkably short. When the latest housekeeper vanishes in mysterious circumstances, DI Kelso Strang is called to the remote corner of the Isle of Skye to investigate. Keen to move on from recent personal horrors, Strang revels in the responsibility the investigation affords. But with Beatrice unprepared to face the reality of what Human Face has become and vital errors made when his team underestimates the danger, Strang has his work cut out to negotiate the highly complex situation and avoid the case ending in disaster. 'THE CRIME CZAR OF THE SCOTTISH SMALL TOWN' VAL MCDERMID

Featured on CBS This Morning, Squawk Box, MSNBC, CNN, Bloomberg, Forbes, Fast Company, The New York Times, and more. "Reading Face to Face is like being a fly on the wall, watching Brian Grazer work his magic. Utterly entertaining, this is how you become Hollywood's best producer." —Malcolm Gladwell, author of Talking to Strangers Legendary Hollywood producer and author of the bestselling A Curious Mind, Brian Grazer is back with a captivating new book about the life-changing ways we can connect with one another. Much of Brian Grazer's success—as a #1 New York Times bestselling author, Academy Award-winning producer, father, and husband—comes from his ability to establish genuine connections with almost anyone. In Face to Face, he takes you around the world and behind the scenes of some of his most iconic movies and television shows, like A Beautiful Mind, Empire, Arrested Development, American Gangster, and 8 Mile, to show just how much in-person encounters have revolutionized his life—and how they have the power to change yours. With his flair for intriguing stories, Grazer reveals what he's learned through interactions with people like Bill Gates, Taraji P. Henson, George W. Bush, Barack Obama, Eminem, Prince, Spike Lee, and the Afghani rapper activist Sonita: that the secret to a bigger life lies in personal connection. In a world where our attention is too often focused downward at our devices, Grazer argues that we are missing an essential piece of the human experience. Only when we are face to face, able to look one another in the eyes, can we form the kinds of connections that expand our world views, deepen our self-awareness, and ultimately lead to our greatest achievements and most meaningful moments. When we lift our eyes to look at the person in front of us, we open the door to infinite possibility.

Thomas Piketty's Capital in the Twenty-First Century initiated a great debate not just about inequality but also regarding the failures found in the economic models used by theoreticians and practitioners alike. Wealth of Persons offers a totally different perspective that challenges the very terms of the debate. The Great Recession reveals a great existential rift at the core of certain economic reflections, thereby showing the real crisis of the crisis of economics. In the human sciences we have created a kind of "Tower of Babel" where we cannot understand each other any longer. The "breakdowns" occur equally on the personal, social, political, and economic levels. There is a need for an "about-face" in method to restore harmony among dissociated disciplines. Wealth of Persons offers a key to such a restoration, applying insights and analysis taken from different economic scholars, schools of thought, philosophical traditions, various disciplines, and charismatic entrepreneurs. Wealth of Persons aims at recapturing an adequate understanding of the acting human person in the economic drama, one that measures up to the reality. The investigation is a passport allowing entry into the land of economic knowledge, properly unfolding the anthropological meaning of the free economy.

One minute you've got a quiet life. No friends except those in your record collection. Free from technological slavery. Just pizza for dinner and a job you love at the local record store... Funny how things spiral out of control... Next thing you know you're embroiled in some poorly thought out conspiracy. Cavorting with shady government officials, scientists and recently resurrected music legends. A cog in a baffling plot that keeps getting stranger by the minute. Getting shot at, kidnapped, trailed by possible alien-human hybrids. Forced to endure not only potentially dangerous scientific experiments but also the crackpot philosophical musings of possible agent/probable nutcase Jones. A man on a mission that could lead to complete knowledge... or the complete destruction of the world. And all because you did a little accidental necromancy on your way home from work. Funny how things spiral out of control...
