Philip Latinowicz returns to his native town, a Croatian provincial backwater. Seeking relief for his neurasthenia and hoping to revive his artistic inspiration, he settles down with his mother and her circle of friends. Before a dramatic end, *The Return of Philip Latinowicz* is slow-moving. It is dense, heavy with detail and exploration of its characters, delving backwards into their earlier lives.

From the great Croatian writer: a masterly work of literature--hilarious, unforgiving, and utterly reasonable

When we think about what it is we do in academic literary studies, we do so taking account of time - the time of the institution in which this disciplinary practice takes place, and the history of the discipline itself. Since literary studies engage contemporary issues and how they impact the reader, we must also acknowledge processes and events outside the field. The contributions to this volume engage with the idea

of temporality not only in Anglophone literature studies, but in the humanities as a whole. In the first section, the literary contributions show that the humanities owe a debt to the past – new paradigms question and challenge the validity of older ones without necessarily discarding them. The second section shows how the disciplinary archive can be modified and expanded to engage its present condition, while the last deals with what that condition forebodes. Despite the range of perspectives adopted here, all contributions echo the history of the discipline of literary studies itself, its present condition, and the possibilities for its survival in an age in which the relevance of humanities is

being disputed.

"On the Edge of Reason is one of the great European novels of the first half of the twentieth century - and Krleza's themes, his seriousness, his protest against the normality of delusion and cruelty, could hardly be more relevant to the century's end." —Susan Sontag

During his long and distinguished career, the Croatian writer Miroslav Krleza (1893-1981) battled against many forms of tyranny. In *On the Edge of Reason*, his protagonist is a middle-aged lawyer whose life and career have been eminently respectable and

respected. One evening, at a party attended by the local elite, he inadvertently blurts out an honest thought. From this moment, all hell breaks loose.... On the Edge of Reason reveals the fundamental chasm between conformity and individuality. As folly piles on folly, hypocrisy on hypocrisy, reason itself begins to give way, and the edge between reality and unreality disappears.

Continuing the work undertaken in Vol. 1 of the History of the Literary Cultures of East-Central Europe, Vol. 2 considers various topographic sites—multicultural cities, border areas, cross-cultural corridors, multiethnic regions—that cut across

national boundaries, rendering them permeable to the flow of hybrid cultural messages. By focusing on the literary cultures of specific geographical locations, this volume intends to put into practice a new type of comparative study. Traditional comparative literary studies establish transnational comparisons and contrasts, but thereby reconfirm, however inadvertently, the very national borders they play down. This volume inverts the expansive momentum of comparative studies towards ever-broader regional, European, and world literary histories. While the theater of this volume is still the literary culture of East-Central Europe, the contributors focus on pinpointed local traditions and geographic nodal

points. Their histories of Riga, Plovdiv, Timișoara or Budapest, of Transylvania or the Danube corridor – to take a few examples – reveal how each of these sites was during the last two-hundred years a home for a variety of foreign or ethnic literary traditions next to the one now dominant within the national borders. By foregrounding such non-national or hybrid traditions, this volume pleads for a diversification and pluralization of local and national histories. A genuine comparatist revival of literary history should involve the recognition that “treading on native grounds” means actually treading on grounds cultivated by diverse people.

Goethe's 1832 poem Faust offers a vision of humanity realising freedom and prosperity through transcending natural adversity. Changing European Visions of Disaster and Development returns to Faust as a way of exploring the rise and fall of European humanist aspirations to build free and prosperous national political communities protected from natural disasters. Faust stories emerged in early modern Europe linked to the shaking of the traditional religious and political order, and the pursuit of new areas of human knowledge and activity which led to a shift from viewing disasters as acts of God to acts of nature. Faust's dam building and land reclamation project in Goethe's poem was inspired by Dutch hydro-

engineering and in turn inspired others. Faustian dreams of an engineered future were pursued by the American Yugoslav inventor Nikola Tesla and the country of his birth towards establishing its national independence and escaping the fate of being a borderland. Faust remains a compelling reference point to explore European visions of disaster and development. If Faust captured the European spirit of earlier centuries, what is today's outlook? Ambitious Faustian development visions to eradicate natural disasters have been replaced by anti-Faustian risk cosmopolitanism sceptical towards human activity in ways counter to building collective protection from disaster. Tesla's country of birth fears returning to

being an insecure borderland of Europe. This powerful and timely book calls for a rekindling of European humanism and Faust's vision of 'free people standing on free land'.

By Stuart Morgan. Edited by Ian Hunt.

This book examines the ways in which fiction has addressed the continent since the Second World War. Drawing on novelists from Europe and elsewhere, the volume analyzes the literary response to seven dominant concerns (ideas of Europe, conflict, borders, empire, unification, migration, and marginalization), offering a ground-breaking study of how modern and

contemporary writers have participated in the European debate. The sixteen essays view the chosen writers, not as representatives of national literatures, but as participants in transcontinental discussion that has occurred across borders, cultures, and languages. In doing so, the contributors raise questions about the forms of power operating across and radiating from Europe, challenging both the institutionalized divisions of the Cold War and the triumphalist narrative of continental unity currently being written in Brussels.
