The American Heritage Journal of Creativity (AHJC) is a biannual journal of research from American Heritage University of Southern California located in the San Bernardino County in California, USA. It is published twice in a year. It accepts creativity as going beyond the possession and use of artistic, musical or writing talent, but permeating throughout the curriculum, in science, social studies and other areas. Research works conducted in the academia without restriction to subject are invited. The objectives of AHJC are to disseminate internationally pragmatic academic research solutions in diverse disciplines that are functionally creative and relevant to community and universal issues. Essentially, the crucial requirement is that it has to be a research paper with empirical findings. AHJC provides a multidisciplinary forum for the publication of original research and technical papers, short communications, state-of-the-art developments in the liberal arts and sciences. Aside from articles, we also encourage prospective authors to submit book reviews, notes, short commentaries and full page relevant advertisements.

County Village is a book about life in a typical Nigerian secondary school. It is intended to preserve the way of life and pattern of secondary school administration common in Nigeria. The modern Nigerian society is one in which the precious pattern our secondary schools, especially the boarding schools, were been run administratively in the colonial era, is fast eroding. Secondly, the book outrightly condemns the desecration of the Christian faith by the defunct African Writers Series led by Chinua Achebe. It goes ahead to condemn corruption, police brutality and ineptitude in Nigeria. It mocks the entire African Society using Nigeria as case study plus other miscellaneous themes.

The papers in this collection present the numeral systems of more than twenty Nigerian languages. The papers mainly emanate from a workshop on the numeral systems of Nigerian languages organised by the Linguistic Association of Nigeria during its 23rd Annual Conference which was held at the University of Port Harcourt, Nigeria. The workshop arose from awareness created by Dr. Eugene S.L. Chan on the need for Nigerian linguists to document this severely endangered but very important aspect of natural languages. The quantum of mathematical computations - addition, multiplication, subtraction, or a combination of two or all of these - involved in the numeral systems of Nigerian languages is remarkable. The papers reveal that a variety of numeral systems do exist, such as: binary, decimal, incomplete decimal, duodecimal, quinary, quaternary, ternary, mixed, body-part tally systems, and much more. The book is a resource about how different languages manipulate their numeral systems.

Cohen argues that the values and programs characteristic of modern American liberalism were invented not during the Progressive Era, as is generally assumed, but in the conflict-ridden years after the Civil War.

501 Synonyms and Antonym Questions is designed to help students prepare for the verbal sections of most assessment and entrance exams. The book increases a student's vocabulary and refines their knowledge of words, bringing about higher standardized test scores and more effective verbal and written communication. Questions in this book prepare students for the synonym and antonym problems found on most standardized tests-including high school entrance exams, the SAT, civil service exams, and the GRE. The book increases in difficulty as students move through each exercise. All answers are explained, featuring short definitions and terms that clarify word meanings and their opposites for effective studying and positive reinforcement.
