Daryl Guppy's trading book Share Trading has been continuously in print for ten years. Share Trading was first published in 1996, and it is now widely accepted as the best selling trading book in Australia. This Special 10th Anniversary Edition marks this remarkable achievement. Featuring a new preface by Daryl Guppy, this is a book about trading. It's about private traders working from home, buying and selling shares in listed companies. It is also about making money and that means buying and selling for profit.

The first edition of this book was published during a raging bull run and still proved a sell-out success. The reason is simple -- the bears are always with us. Fat bears, slow bears and little bears are not the traders' enemy. When markets stumble, private traders DO make money. Already, thousands of Australians earn their living by trading the financial markets. Many traders have progressed, step-by-step, from long-term investing to position equity trading, acquiring their skills against the background of the seemingly ever-rising market. They may have found that trading for a living is hardly the easiest of careers, even in the good times, when the bulls are running. They wonder if it is possible to continue trading when the market is rocked by the bears. Daryl Guppy knows from experience that it is. The bears are always with us. Even at the height of a bull run, still some corners of the equity market are in their grip and he shows how to trade these 'bear dips'. He

has also traded during the resources and Asian bear markets and many of the examples in this book are trades he has personally taken. There are two sides to the market -- long and short. The author explores the short side -- selling high and buying low -- and demonstrates practical ways to trade these warrants and options. In this comprehensive book, Daryl Guppy discusses a broad sample of methods the private trader can use not only to survive, but to prosper in falling or static markets.

Ancient strategies provide a valuable link to enhance your ability to survive and prosper in modern financial markets. In this fascinating book, experienced trader and best-selling author Daryl Guppy explains how The 36 Strategies of the Chinese are applied to trading financial markets. In trading there is rarely a single answer to any trading situation. The best answer, and its effective application, depends on the trader. The strategies by themselves do not guarantee success. The trader's skill in analyzing and assessing the situation determines how effective he is in selecting and applying the right strategy. Guppy was introduced to the book of The 36 Strategies of the Chinese by a Chinese friend. An ancient and classic text, it is a compilation of political and military strategies dating back more than 1800 years, drawn from classic Chinese poetry, history, philosophy, biographies and novels. This book includes specific methods for active investors and traders that are consistent with the meaning of the original ancient strategies. The 36 Strategies of the Chinese for Financial Traders follow the structure of the original 36 Strategies of the Chinese. The first 18 strategies are applied when you have the advantage -- the luxury of time and resources to examine techniques to recognize and maximize the return from these market opportunities. The second 18 strategies are applied when you are at a disadvantage -- they are strategies used against investors and traders to inhibit success. Many of the strategies are enhanced using derivatives.

Many traders arm themselves with the latest software and as many indicators as they can get their hands on in an attempt to improve trading results. There is an easier way. As a private trader, you level the market playing field by using the best money management strategies for your account size. Trading skill counts, but money management gives you an important edge. From the straightforward 2% rule, to pyramiding methods and overall portfolio management, Daryl takes you through a selection of strategies. They allow you to capitalise on a rising market and protect your funds when the bears take over. He shows you how to study your own trading history and use this information to improve your trading future. These methods make the difference between trading survival and consistent success. Daryl Guppy is one of Australia's leading investment writers and he makes a living as a private trader. He uses the tools and techniques in Better Trading to improve the profitability of his own portfolio.
