In a heart-wrenching, candid autobiography, a human rights activist offers a firsthand account of war from the perspective of a former child soldier, detailing the violent civil war that wracked his native Sierra Leone and the government forces that transformed a gentle young boy into a killer as a member of the army. 75,000 first printing.

Drawing on reports from the world over, this details the lives of parents and daily caregivers who are striving, in the face of war and poverty, to protect the rights and meet the needs of young children from birth to the age of 3.

Anhand tiefgehender Einblicke in die Arbeitsweise von UNICEF werden unbeabsichtigte, dysfunktionale Institutionalierungsprozesse in Organisationen untersucht. So ist die Trennung von Rhetorik und Handlung, in der Literatur bekannt als "Organized Hypocrisy", ein ebenso nützliches wie gefährliches Instrument. Während diese Strategie einerseits dazu beiträgt, das Überleben einer Organisation zu sichern, verursacht sie andererseits eine Fragmentierung ihrer Struktur, die zu einem unentrinnbaren "Hypocrisy Loop" führt. Die Konsequenzen wirken sich nachteilig auf die interne Arbeitswelt wie auch die externe Leistungserbringung aus. Die Studie widerlegt somit die Annahme, dass "Organized Hypocrisy" per se funktional ist. Durch das Aufzeigen der Dynamiken, die entstehen, wenn Rhetorik und Handlung über Jahre getrennt werden, schließt das entwickelte Modell eine Lücke im soziologischen Institutionalismus, dem eine plausible Theorie über Institutionalierungsprozesse in Organisationen fehlt.

Singapore's well-documented economic progress since independence owes a big debt to the initial investment that the nation made in raising the nutrition, hygiene, health and education standards of its children. In the early days the United Nations Children's Fund (UNICEF) provided some assistance. The relationship has evolved as Singapore's socioeconomic circumstances improved. Educated and qualified Singaporeans themselves were recruited into the ranks of UNICEF international staff, and left their home country to work on programmes for vulnerable children in developing countries throughout the world. As Singapore celebrates its Golden Jubilee in 2015 and UNICEF looks forward to its 70th anniversary in 2016, *Singapore and UNICEF: Working for Children* takes a timely look at their past collaborative efforts to advance the rights of the child and help children realise their full potential. Although UNICEF has collaborated with many partner institutions and individuals in Singapore over the past few decades, little has been documented and not all in one publication. The lively essays, candid interviews and first-hand accounts in this volume provide meaningful reflections on the history of the relationship and insights into UNICEF's work and its involvement with diverse parts of Singapore society. Written by several former UNICEF staff, consultants and volunteers, this book will appeal to all who are interested in development, human rights, civil society and the work of a UN humanitarian agency. As modern technologies continue to develop and evolve, the ability of users to interface with new systems becomes a paramount concern. Research into new ways for humans to make use of advanced computers and other such technologies is necessary to fully realize the potential of 21st century tools. Human-Computer Interaction: Concepts, Methodologies, Tools, and Applications gathers research on user interfaces for advanced technologies and how these interfaces can facilitate new developments in the fields of robotics, assistive technologies, and computational intelligence. This four-volume reference contains cutting-edge research for computer scientists; faculty and students of robotics, digital science, and networked communications; and clinicians invested in assistive technologies. This seminal reference work includes chapters on topics pertaining to system usability, interactive design, mobile interfaces, virtual worlds, and more.
