The i5801 from VTech is a 5.8 GHz accessory handset loaded with great features. Designed for use with VTech's VT 5831 and i5881 expandable phone systems, the i5801 utilizes the 5.8 GHz frequency and digital spread spectrum technology, providing greater clarity and range than either 2.4 GHz or traditional 900 MHz phones.

Beginning Android Games, Second Edition offers everything you need to join the ranks of successful Android game developers, including Android tablet game app development considerations. You'll start with game design fundamentals and programming basics, and then progress toward creating your own basic game engine and playable game apps that work on Android and earlier version compliant smartphones and now tablets. This will give you everything you need to branch out and write your own Android games. The potential user base and the wide array of available high-performance devices makes Android an attractive target for aspiring game developers. Do you have an awesome idea for the next break-through mobile gaming title? Beginning Android Games will help you kick-start your project. This book will guide you through the process of making several example game apps using APIs available in new Android SDK and earlier SDK releases for Android smartphones and tablets: The fundamentals of game development and design suitable for Android smartphones and tablets The Android platform basics to apply those fundamentals in the context of making a game, including new File Manager system and better battery life management The design of 2D and 3D games and their successful implementation on the Android platform This book lets developers see and use some Android SDK Jelly Bean; however, this book is structured so that app developers can use earlier Android SDK releases. This book is backward compatible like the Android SDK.

"Provides an analysis of the constitutional principles governing the European Union. It covers the history of the EU, the constitutional foundations, the institutional framework, legislative and executive governance, judicial protection, and external relations"--Publisher's website.

Competition Law and Policy in the EU and UK provides a focused guide to the main provisions and policies at issue in the EU and UK, including topics such as enforcement, abuse of

dominance, anti-competitive agreements, cartels, mergers, and market investigations. The book 's contents are tailored to cover all major topics in competition law teaching, and the authors ' clear and accessible writing style offers an engaging and easy to follow overview of the subject for course use. The fifth edition provides a full update for this well-established title, presenting and contextualising the impact of key cases, as well as changes to enforcement practice, and at a legislative and institutional level. There are new, separate chapters in this edition on private enforcement and UK market investigations to reflect the increasing significance of these key areas of competition law practice. Competition Law and Policy in the EU and UK integrates useful pedagogical features to help clarify topics and reinforce important points: chapter overviews and summaries highlight the key points to take away from each chapter to structure student learning discussion questions facilitate self-testing and seminar discussions of the major issues covered in each chapter, to help reinforce understanding of these topics further reading lists additional resources in order to guide research and develop subject knowledge a new glossary provides succinct explanations of competition law terminology, ideal for those studying the topic for the first time Clear, focused and student-friendly, this title offers a comprehensive resource for students taking competition law courses, and is supported online by updates to the law offered on Angus MacCulloch ' s blog, Who ' s Competing (<http://whoscompeting.wordpress.com/>).

This book is a collection of ISRM suggested methods for testing or measuring properties of rocks and rock masses both in the laboratory and in situ, as well as for monitoring the performance of rock engineering structures. The first collection (Yellow Book) has been published in 1981. In order to provide access to all the Suggested Methods in one volume, the ISRM Blue Book was published in 2007 (by the ISRM via the Turkish National Group) and contains the complete set of Suggested Methods from 1974 to 2006 inclusive. The papers in this most recent volume have been published during the last seven years in international journals, mainly in Rock Mechanics and Rock Engineering. They offer guidance for rock characterization procedures and laboratory and field testing and monitoring in rock engineering. These methods provide a definitive procedure for the identification, measurement and evaluation of one or more qualities, characteristics or properties of rocks or rock systems that produces a test result.

As the European Union continues to sort itself out, it has been making rapid and significant changes in the rules of competition. This edition includes the latest decisions as of 1 May 2004 and is written for those who must immediately apply them to their businesses. Primary topics include the fundamentals of EC competition law and examinations of

This book is the fourth edition of a highly practical guide to the leading cases in European Competition Law. It explores the application of Article 101 TFEU, Article 102 TFEU and the European Merger Regulation, as well as the public and private enforcement of Competition Law. In addition, it reviews the intersection between Competition Law and Intellectual Property Rights and the application of Competition Law to State action. Each chapter outlines the relevant laws, regulations and guidelines for each topic. Within this framework, cases are reviewed in summary form, accompanied by analysis and commentary. "This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decision but also some of the leading cases from the US and European Member States." Ali Nikpay, Gibson, Dunn & Crutcher "The study of EU Competition law requires the analysis and understanding of a number of increasingly complex and lengthy European Commission and European Court decisions. Through the provision of case summaries, excerpts from the important passages and concise commentary linking these decisions to other key case law and Commission documents, this unique and impressive book provides the student and practitioner of EU competition law with an extremely clear and useful introduction to these leading decisions." Dr Kathryn McMahon, Associate Professor, School of Law, University of Warwick "The Guide is an invaluable tool for both students and practitioners. It provides a compact overview on the fundamental cases and highlights the essential problems in a clear and sharp analysis." Dr Christoph Voelk, Antitrust Practice Group, McDermott, Will & Emery LLP, Brussels "This edition will be especially valuable to competition law specialists abroad who are interested in the jurisprudence and policy of the European Union and its member states. Familiarity with the European regime is essential for proficiency in competition law today, and this volume provides an excellent foundation." William E Kovacic, Global Competition Professor of Law and Policy, George Washington University Law School, Former Chairman, US Federal Trade Commission "A perfect reference for students of competition law, giving them a kick start when searching for EU case law on a specific subject." Magnus Strand, University of Uppsala, Sweden
