Air / Dirt Separation and Dosing Solutions - Installations in which the water has been properly degassed, and are free from all kinds of dirt particles, use less energy, produce less noise and have a longer service life. Flamco products provide these sustainable solutions. In our products we use established principles combined with new technologies, such as with the XStream series of air and ...

Air / Dirt Separation and Dosing Solutions | Flamco Group

SpiroCombi deaerators/dirt separators are designed for the simultaneous removal of air and dirt from water systems. These remove air, microbubbles and dirt particles from system water continuously. In untreated heating and cooling systems, air causes problems such as flow interruptions or even complete system failure.

Pumps UK Ltd offer a full range of
Stainless Steel Air and Dirt separators for
Heating and Chilled water systems. The
units are installed in the pipework header
so that the systems water passes through
the separator. The air is forced to the top
of the unit and released by the air vent.

We provide a range of automatic air vents and separators that deliver industry-leading air, dirt, sludge and magnetite separation capabilities for heating and cooling water systems. They benefit from our innovative 'helistill' and 'cyclonic' technologies that help prevent damage to critical HVAC components, such as boilers, pumps and valves, reduce maintenance demands and extend the lifespan of any type of installation.

Automatic air vents and separators - ESC
The Stourflex range of air and dirt separators provide an ideal solution to the problems of air and dirt in heating and chilled water systems - if air and dirt are not removed, system efficiency is severely reduced. Excess air in a system causes noise and oxidation which in turn leads to the formation of dirt.
