According to "The Magazine of Fantasy & Science Fiction" Miscellany, "Kristine Kathryn Rusch even had one issue of F&SF, June 1996, announced as the 'New Writer Issue, ' in which 7 of its stories, all the fiction pieces, were either first sales or first published stories." "Jonny Punkinhead," which appeared in that issue, was Amy Sterling Casil's first professional science fiction and/or fantasy short fiction sale. It was not her first professional fiction sale, nor first published story, but rather first professional "Science Fiction Sale." "Jonny Punkinhead" tells the story of Dr. Hedrick Arlan, who is in charge of the Southern California Sherman Institute for Differently-Abled Children, and how hard it is for Dr. Arlan to balance his professional life, family, and trying to cope with the unwanted children who are victims of Human Mutational Virus -- or "freaks" like Jonny. Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a

cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines

Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions—both big and small—have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans,

we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In *The Paradox of Choice*, Barry Schwartz explains at what point choice—the hallmark of individual freedom and self-determination that we so cherish—becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice—from the mundane to

the profound challenges of balancing career, family, and individual needs—has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences, Schwartz makes the counter intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make.

The Table of Contents which appears following the Index will be a valuable guide to the reader, It was in 1747 when Casimir Orthner, a successful landowner and vintner, a man of 56, well past his prime for such a grueling sea voyage, left the Vaterland for the Neuland. What were his reasons for uprooting his family; leaving extended family and friends behind for all time; undertaking the perilous journey across the ocean; facing the cultural changes awaiting them in the British Colonies? Devastation by war, oppression by petty rulers, the destructive winter of 1708-1709, religious bickerings and harangues, possibly a strong desire to secure freedom for his posterity; any one or combination of these were probably Casimir's reasons for leaving the Palatinate. At a time when most peasants were illiterate, he could write - evidenced by his signature on the

ship's passenger list! Casimir Ortner, the patriarch, only lived in the new world for 11 short years, leaving behind his widow and several children. This book is their history...his legacy. They were "the common folk." His descendants have been found in Pennsylvania, Maryland, South Carolina, Alabama, Ohio, Indiana, Tennessee, Minnesota, and Missouri...and were among the many, many unsung heroes and heroines who played a large part in the evolution of our country: Indian Skirmishes, Militia Service, Revolutionary War, War of 1812, and the Civil War. Their history may not be marked by wonderful gifts of fortune or fame; nor public distinction in the Old World or the New; there are few chronicles of their struggles and contributions during the birthing years of our nation, the hardships endured. Old records are scant, difficult to come by, and often difficult to read. In some instances, I have deferred to the

preponderance of the evidence! No work of this magnitude is without errors. I have chronicled as accurately as possible all I have uncovered during my 40+ years of research about their lives in the New World. I have had to unearth, sift and sieve through mountains of records, dust and piece together shards of their history, much like an archeologist, to relate their time in this country. They left only a few clues to attest to their patriotism; readily defending their chosen country; generations each serving whenever the need arose, at whatever cost and detriment to their families.

America's secret lies in the liberties that Americans and others see incarnated in the daily life of the land--its courts, its marketplaces, its schools and churches, its families and friendships. From the records of many of these places comes this collection of patriotic
