cells. They have no energy metabolism, they do not grow, they produce no waste products, they do not respond to stimuli, and they do not reproduce independently.

Viruses - CliffsNotes Study Guides
Viruses are not living organisms,

Online Library Viruses And Bacteria Guided Study

Viruses are. Viruses only grow and reproduce inside of the host cells they infect. When found outside of these living cells, viruses are dormant. Their “ life ” therefore requires the hijacking of the biochemical activities of a living cell. Bacteria, on the other hand, are living organisms that consist
