What is sports and performance vision?
~~Overlooking our vision | Cameron McCrodon | TEDxVictoria~~ Vision In Sport Visual Performance

In sports, vision has the potential to affect an athlete ' s performance, including clarity of sight, motor performance (the ability to perform specific tasks), and information processing. 2 Visual skills for all sports include visual acuity, eye tracking, eye-hand-body coordination, visual memory, peripheral vision and depth perception. Overall ability to process and respond to visual stimuli also strongly enhance an athlete ' s eye-hand coordination.

~~Vision and Sports Performance — ISVA — International ...~~

Even for athletes without any vision problems, improving visual performance—such as increasing dynamic visual acuity, decreasing reaction times and improving eye-hand coordination—is an integral component to improving overall performance.

~~Sports & Performance Vision (SPV) | AOA~~

The vision and perceptual skills often identified as important for sports include static and dynamic visual acuities, contrast sensitivity, stereopsis, accommodative-vergence facility, the span of perception, multiple object tracking, central eye-hand reaction speed, and peripheral eye-hand response speed. 3 Some aspects of these

visual skills are assessed as part of a routine vision exam, but many are not evaluated for various reasons.

~~Optimizing Visual Performance for Sport — Part 1 — EyePromise~~

Sports Vision Exercises Motor skill instruction has begun to benefit from a recent area of sport science research focusing on what is called sports vision. Sports vision is an area of study that combines vision science, motor learning, biomechanics, sport psychology, and neuroanatomy as they relate to visual/perceptual motor performance.

~~Vision and Sport Performance~~

Vision in Sports. Vision is the process of seeing and perceiving the surrounding environment by using information contained in light. Appropriate visual information is imperative for almost every sporting task to ensure that athletes are able to monitor the actions of others, while also perceiving their position in relation to targets, such as balls, nets, and walls, and the playing environment.

~~Vision in Sports — IResearchNet~~

Sports Vision Performance. SPORTS VISION PERFORMANCE (SVP) from M&S includes six aspects of vision that are critical for optimal sports performance. The protocol is designed to step the administrator through each test with ease and precision; in other words, the protocol does the work.

Dr. Brandon Walley is an optometrist and owner of a Sports Vision Performance practice called Elite Vision Performance in Collierville, Tennessee. He is also the owner of the primary care optometry clinic Collierville Vision Center. He helps athletes of all ages improve in their sport through vision performance training. Dr.

~~The Basics of Sport Vision Training with Dr. Brandon Walley~~

Many sports vision skills can be addressed to improve athletic performance, such as: Hand-eye coordination, which helps athletes — including baseball players at bat — anticipate and hit a fast-moving ball. Improved depth perception to aid athletes such as downhill skiers when they negotiate turns and avoid obstacles.

~~Sports vision tests and training~~

Sports vision training at Advanced Vision Therapy Center develops visual skills used during visual input as well as visual processing in order to improve overall visual reaction speed. Improved visual reaction speed in essence allows the athlete to see the game in “slow motion”; giving the athlete time to anticipate, react and make game changing decisions all with improved accuracy and split-second timing.
