horse can be fed a larger quantity of food that provides fewer calories.

~~Extruded feed explained - The Horse Owner's Resource~~
Extrusion increases the availability of all nutrients to the horse. Extruded feeds encourage chewing and saliva production.

Download Ebook What Is Saliva production is

essential for preventing gastric ulcers because it acts as a buffer to stomach acid.

Extruded feeds virtually eliminate dust and fines. Less dust at the bottom of the bag means more nutrients actually getting into the horse. Extrusion allows for

Each bite of extruded feed is uniform, like a pellet, but extruded feed is softer and easier to chew.

Horses also tend to consume extruded feeds slower than a comparable pellet.

Extruded feeds typically contain little dust, making it a good option for horses with respiratory concerns.
